

Job Posting

Seccuris is a Canadian-owned information assurance company that provides clients with an array of managed information systems audit, consulting, and product solutions. Seccuris allows clients to focus on their core business effectively by providing professional solutions that ensure their information is secure.

A challenging opportunity is currently available at Seccuris, within the Professional Services division:

Digital Forensics Investigator

Summary

As part of the Professional Services team, the Digital Forensics Investigator provides investigative and related consulting services to external and internal clients.

Specific responsibilities include investigation coordination, incident handling process support, forensic process development and consultation specific to digital evidence. The qualified individual will be responsible for examination and analyses of electronic media and related enterprise environment in support of fraud, intrusion, counterterrorism, counterintelligence, and criminal cases supporting both Provincial and Federal law enforcement and intelligence agencies.

Key Responsibilities

- Plan and conducts engagements, including digital evidence identification, acquisition and analysis functions
- Develop clear strategies for case work, leading and advising clients
- As required, testify in court of law as a fact witness to specifics of a case or as an expert witness to the digital forensic process
- Engage clients in interviews, surveys, and data collection to complete forensic processes
- Work directly with clients both on the development of work plans and execution of the consulting engagements
- Develop deliverables in accordance with the work plans developed collaboratively with our clients and legal requirements
- Develop well-written and well-structured deliverables in easily comprehensible terms, for both client and internal audiences
- Contributes to the ongoing development of knowledge and practices within Seccuris to enhance our services to our clients

- Ongoing professional development activities focused on digital forensics and information security including the pursuit of designations such as CFI, CFE, EnCE, CISSP, etc.
- Various other duties as assigned
- Participate in pre-sales discussions with customers when scoping projects and developing proposals

The following qualifications are required:

- Minimum of 5 years of experience in Investigative or Intelligence environments (Governmental or Industry)
- 2 years of digital forensic experience in a Law Enforcement, Government or Intelligence Agency
- Experience with Encase and/or FTK
- Working knowledge of Unix & Windows operating systems
- Desire and dedication to pursue relevant professional designations if not yet obtained.
- Proven ability to manage projects and teams
- Experience communicating with management and executives
- Outstanding organizational skills
- Excellent facilitation and negotiation skills
- Excellent verbal and written communication skills
- Ability to work to tight deadlines
- Ability to multitask and manage time efficiently
- High level of motivation to achieve superior results
- Proven ability to prioritize tasks effectively with attention to detail
- Team player who can work effectively in required situations
- Travel may be required

The following qualifications are considered a strong asset:

- Bachelor's degree in Computer Engineering, Science or related field.
- Proven experience as a Reporting Officer to evidential standards
- Working knowledge of Windows CE, Embedded and Apple operating systems.
- Certification & formal training in Encase & FTK

Qualified candidates are invited to forward their resume with references and a covering letter to:

careers@seccuris.com

Only candidates considered for the role will be contacted.

All candidates will be required to complete federal security clearances and relevant background checks.

Candidates under consideration may be required to complete a written knowledge examination prior or pursuant to an interview.
