

Job Posting

Seccuris is a Canadian-owned information assurance company that provides clients with an array of managed information systems audit, consulting, and product solutions. Seccuris allows clients to focus on their core business effectively by providing professional solutions that ensure their information is secure.

A challenging opportunity is currently available at Seccuris, within the Professional Services division:

Information Security Consultant

Summary

As part of the Professional Services team, the Information Security Consultant plans, organizes, and conducts information security consulting assignments with our customers. The Information Security Consultant assists clients with the development of Information Security strategies, policies, and architectures, performs assessment of the organization's information security posture, including processes, policies, and technical assessments, and provides general information security advice and guidance. Additionally, the Information Security Consultant will collaborate with other Seccuris staff to share knowledge and improve organizational practices.

Key Responsibilities

- Plan and conduct information security consulting engagements, including technical assessments, strategy development, security architecture, and policy and process analysis
- Work directly with customers both on the development of work plans and execution of the consulting engagements
- Engage clients in interviews, surveys, and data collection to perform assessments
- Develop deliverables in accordance with the work plans developed collaboratively with our customers
- Develop well-written and well-structured deliverables in easily comprehensible terms, for both client and internal audiences
- Contribute to the ongoing development of knowledge and practices within Seccuris to enhance our services to our customers
- Ongoing professional development activities focused on information security including the pursuit of designations such as CISSP, CCNA, CCNP, CCDA, CISM, etc.
- Participate in pre-sales discussions with customers when scoping projects and developing proposals
- Various other duties as assigned

The following qualifications are wanted:

- Minimum of 5 years of information security consulting or related services with a strong technical background
- Bachelor's degree in Computer Science, Engineering or related field.
- Strong experience with enterprise risk management, security policies and controls, and information security strategy and architecture.
- Background in control assessment, technical systems and environments, and processes.
- Desire and dedication to pursue relevant professional designations if not yet obtained.
- Demonstrated ability to ensure deliverables meet work plan specifications and deadlines.
- Proven ability to manage projects and teams.
- Experience communicating with management and executives
- Outstanding organizational skills
- Excellent facilitation and negotiation skills
- Excellent verbal and written communication skills
- Ability to work to tight deadlines
- Ability to multitask and manage time efficiently
- High level of motivation to achieve superior results
- Proven ability to prioritize tasks effectively with attention to detail
- Team player who can work effectively in required situations
- Travel may be required

Qualified candidates are invited to forward their resume with references and a covering letter to:

careers@seccuris.com

Only candidates considered for the role will be contacted.

All candidates will be required to complete security clearance and background checks.

Candidates under consideration may be required to complete a written knowledge examination prior or pursuant to an interview.
