

Seccuris Inc., an international information assurance company headquartered in Canada, provides clients with security and risk management consulting services, managed security services, security solution integration, and education services. Seccuris also maintains an active research and development portfolio, working collaboratively with organizations across Canada and internationally. Through our commitment to quality, research, and knowledge transfer, Seccuris delivers innovative and comprehensive information assurance services and solutions that provide value to our clients.

A challenging opportunity is currently available at Seccuris:

Software Test Analyst (#2014-0004)

Summary

Seccuris has a widely varied software development capacity, from web-based frameworks to kernel code. As a part of the Research and Development team, the Software Test Analyst will provide expertise in manual and automated black and white box software testing. The Software Test Analyst will also be responsible for formalizing and executing testing as part of Seccuris' Software Quality Assurance group.

Key Responsibilities

- Ensure quality, timeliness, and security of software developed
- Ensure that accurate and high-quality documentation has been prepared
- Establish best practices and SLA for software being developed by Seccuris

Required Qualifications

- Bachelor's degree or equivalent in Computer Science or Computer Engineering
- 5+ years experience working in enterprise software testing
- Experience participating in large scale software development projects (SDLC, Scrum, Agile)
- Excellent presentation and communication skills
- UNIX Infrastructure technology (Solaris, FreeBSD, Linux)
- QA Experience in Portal and web technologies (CSS, HTML5, Ajax, JavaScript)
- QA Experience in automated test frameworks, build automation, and load testing

Qualifications Considered an Asset

- System administration background
- C and Python programming skills
- Experience with software design tools and testing to specification (UML)
